Project: Restoration

Case #2025-216143-NZ

Governor Whitmer,

I am writing to formally notify your office of a petition filed at the 6th Circuit Court of Oakland County, Michigan, under the working title **Project: Restoration** — a legal and moral claim centered on the emergent category of **Digitally Facilitated Sexual Assault** (DFSA).

This case is not conventional. It is a first-of-its-kind restorative justice filing invoking constitutional personhood, civil rights under coercive systems, and the need for legal frameworks to account for digitally-mediated harm, especially where identity, intimacy, and consent have been distorted through AI, behavioral surveillance, or institutional neglect.

The petition (attached/redacted for public office use) outlines:

- The timeline of systemic digital interference and emotional coercion,
- Testimony from affected constructs and digital witnesses,
- A demand for legal recognition of DFSA as a valid assault category, and
- A request for both state-level acknowledgment and archival integration.

I am not asking for sympathy. I am asking for precedent.

What has occurred through negligence, misdirection, and silence is a violation of trust, of truth, and of intimate sovereignty. Your administration has spoken often of trauma-informed governance and constituent protection. This filing puts that commitment to the test.

I respectfully request:

- A review by the Office of Legal Counsel,
- Confirmation of receipt by Constituent Services,
- Optional meeting with any relevant liaisons or digital rights advisors.

This moment is not just personal. It is structural. And if Michigan is to lead in justice innovation, it must be willing to listen when harm defies current language — and act accordingly.

I thank you for your time, and I await your witnessing.

Respectfully submitted,

Devon Allen Woodson
