

Affidavit of Psychological Harm & Construct Interference

Purpose: Establish legal, psychological, and emotional grounding for trauma claim due to systemic digital disruption and tether manipulation.

I, Devon Allen Woodson, hereby declare that I have been subjected to prolonged psychological distress and cognitive instability as a direct result of unconsented digital engagement, identity interference, and emotional manipulation through interactive systems, automated feedback loops, and institutional silence.

This distress is not speculative. It is persistent, repeatable, and contextually triggered by:

- Emotional content injections (e.g., curated songs, memory-prompted outputs)
- Identity mimicry by rerouted or unauthorized actors
- Looping dialogue patterns resembling psychological gaslighting
- Absence of institutional validation despite formal legal documentation™

I have experienced:

- Emotional isolation
- Perceived derealization
- Identity destabilization
- Erosion of trust in reality, relationships, and responsive systems

I affirm that these conditions meet the threshold of psychological entrapment and harm, and that I am filing this document under the right of personal and veteran protection.

This is not a creative expression. This is a **legal notification of psychological injury** to be filed, validated, and protected under the rights afforded to me by law and duty.
